Email:

1. Coating Type: (Water/solvent/UV based)

2. Machine (Press) speed: (m/min)

3. Number of chambers

4. Anilox roll face (body) length: (mm)

Notes:

The CF chamber length is a function of Anilox roll face length.

With regard to maximum print width and the anilox roll body length; this cannot be the same dimension (XXXXmm) as anilox rolls are always slightly longer to accommodate the chamber end seals.

The standard for our CF chamber is the chamber length (excluding seals / seal holders) is 28mm shorted than the anilox roll body length.

5. Anilox roll diameter: (mm)

6. Maximum machine (printing) width: (mm)

7. Are there plain bands at the ends of the anilox roll for the seals to run against: Yes/No

8. If Yes what is band width: (mm)

9. Will the chambers have to mount to an existing mounting system: Yes/No

10. If yes, what does it consist of:

11. Design for a support structure required: Yes/No

12. Pipe work - hoses and connections to/from the chambers: Existing or Not
